Description:

At Riverchase Dermatology, Dr. Kimberly Davidson specializes in the Liquidlift procedure for facial sculpting without surgery. The procedure utilizes Botox and a multitude of soft tissue fillers to add volume to the face, thereby lifting loose, sagging skin. "As an individual ages, the cheeks gradually begin to look hollow as we lose facial volume due to breakdown of the facial support structure," Dr. Davidson explains. Unlike a traditional facelift, which tightens through a surgical procedure, utilizing soft tissue fillers adds volume, restoring a youthful, contoured appearance of the face. The liquid lift requires no incisions or cutting, no anesthesia and little downtime. Dr. Davidson was featured on NBC2 News performing this revolutionary procedure.
